

# i-Touch V32

Slim-Line Metal Floor standing / Wall Mount kiosk with 15" screen

The V32 is designed to be used as either a Wall Mounted, Desktop or Floor Standing kiosk. The unit is constructed from powder coated steel, and built around standard non-proprietary PC technology.

As well as its wide application range, the most unique feature is the interchangeable option panels, which provide total flexibility in the configuration and functionality. This enables the same unit to be used in one of the three different configurations (Wall/Desk/Floor) to suit all types of environments, while maintaining synergy of product, especially where high traffic and durability is a requirement. The Kiosk houses a video camera for conferencing or monitoring purposes and for unattended or external use a bullet proof TFT screen and anti vandalism keyboard can also be fitted.
